Wall Mount Fiber **Distribution Unit**

12 ports (adapter panel is not included)

Wall Mount Fiber Distribution Unit
12 ports (adapter panel is not included)
OPDIPA12WV

The Optronics Wall Mount Fiber Distribution Unit provides a convenient way to connect a number of fiber optic cables in a wall or specific spot when managing fiber networks. Its cover allows a 180° opening to ease the cable management, as well as to protect the splices.

The Optronics Wall Mount Fiber Distribution Unit contains 1 modular panel which can be custom ordered configured, together with the accessories needed to manage and identify the fibers and reduce installation times.
